

SINA SASANPOUR

Full-Stack Engineer with over 6 years of technical experience specializing in high-performance backend architecture, API design, and automated server workflows. Highly skilled in .NET, microservices decoupling, and Redis caching, alongside modern frontend development (Next.js, Tailwind CSS). Proven track record of optimizing database queries, reducing API latency, and deploying containerized applications via custom CI/CD pipelines.

WORK EXPERIENCE

Mid-level Full-stack Developer (remote) | [Okian.ai](#) | Mar 2025 – Dec 2025

Okian.ai is an advanced Persian-language AI assistant platform offering real-time chat, image generation, and speech-to-text functionalities.

- Built and maintained a highly responsive, modern user interface using Next.js, React, Tailwind CSS, and shadcn/ui.
- Architected scalable backend services using Node.js and PostgreSQL to securely manage persistent conversational data and user sessions.
- Engineered LLM API integrations and configured Redis caching to optimize data streams, handle rate limiting, and ensure low-latency real-time chat.

Technology: Next.js, React, Tailwind CSS, shadcn/ui, Node.js, Redis, PostgreSQL, Git, GitLab

Senior Backend Developer (remote) | Hamrah Samaneh | Feb 2022 – Mar 2024

[Darsad](#)

Darsad is a price comparison and e-commerce platform that scrapes products from online stores like Trendyol.com and Digikala.com.

- Implemented Redis caching layers for the primary price-comparison engine, significantly reducing database read operations and accelerating data delivery to the frontend.
- Contributed to migrating legacy monolithic infrastructure to a microservices architecture, decoupling services and optimizing API data delivery to support the frontend team's transition to server-side rendering (SSR).
- Coordinated with a team of 6 developers through active code reviews and pair programming sessions to share technical knowledge and accelerate sprint velocity.

Technology: ASP.NET CORE, SignalR, MYSQL, Redis, MongoDB, Microservices, Git, GitLab

Mid-Level Fullstack Developer | Hamrah Samaneh | Feb 2020 – Feb 2022

[Manamo](#)

Manamo is an online game-based educational application streaming educational videos.

- Built and maintained an internal administrative dashboard, enabling the content team to efficiently upload, tag, and manage educational video assets.
- Implemented Role-Based Access Control (RBAC) to securely manage permissions between student accounts, instructors, and administrative roles.
- Collaborated closely with UI/UX designers to optimize frontend asset loading times and improve cross-device accessibility across the learning platform.

Technology: ASP.NET Core (REST APIs), PHP (server-rendered frontend), HTML, CSS, MYSQL, Git, GitLab

Marital Status: Single

LANGUAGES

English – Fluent

Persian – Native

German – Intermediate

Turkish – Upper-Intermediate

QUALIFICATIONS

Backend: .NET, SignalR, Node.js, Restful APIs, microservices

Frontend: ReactJS, Next.js, HTML, CSS, Tailwind CSS, Framer Motion, Bootstrap

Databases: MongoDB, PostgreSQL, SQLite, Redis, Supabase

Cloud & DevOps: Linux, Nginx, Docker, Kubernetes, CI/CD (GitLab, GitHub), Cloudflare, Virtual Private Server (VPS)

Core Tools & Methodologies: RESTful APIs, TypeScript, Tag Manager, Git, Agile, SSR, Regex, LaTeX

PROJECTS

IMGapp (personal)

Personal image hosting & gallery service
React, Next.js, Framer Motion | .NET
Core 9 | SQLite, Redis, RabbitMQ |
Kubernetes | On VPS

Upload (personal)

Simple file hosting service
JS | .NET Core 8 | On VPS

Faal Akademi (freelance)

Showcasing courses of an education
academy
Next.js | Supabase (PostgreSQL) |
Tailwind CSS | On Cloudflare Workers

Junior Backend Developer | Hamrah Samaneh | Nov 2018 – Feb 2020

EnglishVocab

English Vocab is an application for learning English, serving more than 400K active users.

- Assisted in developing core RESTful APIs and optimizing backend database queries in PHP/MySQL to support high-concurrency mobile app traffic.
- Collaborated with senior engineers to maintain backend service stability, resolve bug reports, and deploy routine system maintenance updates.

Technology: PHP, MYSQL, Git, GitLab

EDUCATION

2022-2024 | **Uludağ University** (Bursa, Türkiye), Associate Degree in Computer Programming

2018-2021 | **PNU North Branch** (Tehran, Iran), Computer Engineering (Completed 3 Years of Coursework)

2018-2019 | **Keyhan German Language Institute** (Tehran, Iran), A1-B2 Level in German language

2016-2017| **Abooreihan High School** (Tehran, Iran), Diploma of Mathematics.
